EDUCATION

RV College of Engineering (RVCE) | Bengaluru, India
Bachelor of Engineering in Computer Science and Engineering | Expected Graduation: July 2029

- **CGPA:** 9.85 / 10.0 (Up to 2nd Semester)
- **Relevant Coursework:** Data Structures, Algorithms, Object-Oriented Programming, Discrete Mathematics.

Sri Gulab Rai Montessori Senior Secondary School | Bareilly, India
Class XII (CBSE) | PCM with Computer Science | Percentage: 96.2% | May 2025

TECHNICAL SKILLS

- **Languages:** C, C++, Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3.
- **Frameworks & Libraries**: React.js, Node.js, Express.js, Flask, Prisma ORM, Tailwind CSS, spaCy.
- **Databases & Dev Tools:** PostgreSQL, SQLite, Supabase, Git, GitHub, Vercel, Render.

PROJECTS

ApexMarket | *FastAPI, Python, Next.js 14, TypeScript, PostgreSQL, Nebius, NVIDIA Nemotron* | *Oct 2026*
Live Demo | ***GitHub***

- Architected an AI batch inference router splitting workloads across spot GPU nodes, achieving 32.2% net cost savings and 3.8s streaming turnaround.
- Engineered a verification engine auditing spot outputs against an NVIDIA Nemotron-3-Nano anchor on Nebius, auto-slashing degraded nodes ($NLL > 2.80$) with zero-loss failover.
- Developed the Next.js 14 Mission Control with real-time WebSocket telemetry (52ms p50 TTFT) and client-side Web Crypto SHA-256 attestation verification.

AI Resume Analyser | *Python, Flask, spaCy, SQLite, JWT, Vercel* | Feb 2026 - Present
Live Demo | ***GitHub***

- Built an NLP-based, real-time screening tool that pinpoints precise candidate skills deficiencies from 1,700+ engineering terms and creates customised learning paths using 5,400+ active resource links.
- Implemented an intelligent OCR extraction pipeline (PyMuPDF + Tesseract) and in-memory query caching, accelerating batch processing speeds by 80% for the active Vercel deployment.
- Utilized a modular Flask REST API, SQLite, and custom HMAC-SHA256 JWT middleware to securely handle user authentication, historical score persistence, and dynamic mock interview generation.

Nexus Event Registration Portal | *Node.js, Express, PostgreSQL, Prisma, TypeScript, JWT* | June 2026
Live Demo | ***GitHub***

- Built a full-stack, high-concurrency event registration Single Page Application (SPA) featuring distinct role-based access for students and gate volunteers.
- Designed a robust backend architecture using PostgreSQL and Prisma ORM, resulting in seamless data processing during simulated 2,000 requests-per-minute traffic spikes with zero database locks.
- Overcame physical gate check-in bottlenecks by integrating the html5-qrcode library directly into the organizer dashboard, enabling secure, real-time ticket validation via device hardware cameras.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- **LeetCode:** Solved 500+ problems (Beats 99.1% of Solvers • Top 0.9% Globally) with a 260+ day streak.
- **Hackathons & Events:** Built a working prototype of PitchTrial (Multi-AI Shark Tank) in 24 hours at Nebius x NovaHackathon. Participated in Hackemon 2.0 (Coding Club) and Team DHI Prompt Masters at RVCE.

EXTRACURRICULAR INVOLVEMENT

Coding Club | RVCE
Technical Team & Event Lead | Dec 2025 - Present

• **Core Organizing & Tech Team** - Coding Club 10th Anniversary (Oct 2026): Orchestrating digital platforms, competition workflows, and technical logistics for the landmark 3-day decennial celebration.
• **Development Team Lead** - CloneFest 2.0: Spearheaded a 5-member technical team to architect and maintain the event's digital infrastructure; managed live feature deployments and ensured zero platform downtime for 180+ participants.
